STEP ONE.

Fix Trap to a tree or post by pre-screwing two square head roofing type screws (or similar) into the trunk at 50mm centres.

STEP TWO.

Simply slide the Trap into position over the screws.

STEP THREE

A, 25mm square X about 600mm long, Setting Bar is slid under the handle of the Trap and lifted to open the Trap.

STEP FOUR

Gently push the Top Bar into the downward position until it clicks into place.

STEP FIVE

A rectangular Safety Wire Bar must be used as a precaution whenever hands are placed in the Trap for baiting or like.

Items used in the setting of Warrior Traps (as referred to above)
